SUMMARY

Frontend Developer with 3 years of experience building scalable React.js applications using Redux, REST APIs, and Webpack. Delivered 67% faster load times and 50% bundle reduction through performance optimization. Experienced in end-to-end feature ownership, unit testing, and Agile delivery.

EXPERIENCE

Software Engineer

Cognam Technologies Pvt Ltd **July 2023 - January 2026, Delhi, India**

- Developed scalable web applications using ReactJS, Redux, Redux Thunk, Redux Saga, Axios, and Material UI, conducting regular code reviews and enforcing frontend best practices across the team.
- Built responsive UIs and multi-step dynamic forms using React Hooks, reusable component architecture, and Material UI.
- Led end-to-end development of 4 major features, from requirement analysis to production release on AWS.
- Integrated RESTful APIs using Axios with JWT authentication, interceptors, and centralized error handling.
- Improved load time by 67%, reduced bundle size by 50%, raised Lighthouse score 60 → 80, and reduced form re-renders by 20% through Webpack optimization, code splitting, and memoization.
- Grew test coverage from 40% → 70% writing unit and integration test cases using Jest and Enzyme; diagnosed and resolved critical production bugs with root cause analysis and minimal downtime.

Software Engineer Intern

Cognam Technologies Pvt Ltd **January 2023 - June 2023, Delhi, India**

- Built and shipped 2+ production features using ReactJS and Redux, writing Jest tests and increasing component-level coverage by 15%.
- Integrated REST APIs and improved frontend performance on a mid-scale enterprise application serving internal business workflows.
- Participated in Agile/Scrum ceremonies and code reviews within a 14+ developer team, contributing to sprint planning and feature grooming.

PROJECT

Sorting Visualizer | HTML, CSS, ReactJS, JavaScript

IIITV

- Visualized 5 sorting algorithms (Insertion, Selection, Bubble, Merge, Quick) with real-time animations across 50+ array sizes and adjustable speed controls.
- Implemented live comparison dashboard tracking swaps and comparisons across algorithms simultaneously enabling side-by-side algorithm analysis.
- Reduced re-renders by 30% during high-frequency animations optimizing state updates using useCallback and useMemo.

EDUCATION

Bachelor Of Technology, Computer Science and Engineering (B.Tech CSE)

Indian Institute of Information Technology Vadodara (IIITV) • Gandhinagar, Gujarat • 05/2019-05/2023

AWARDS & HONORS

Secured third place in CodeHers-2022 IIITV Annual Competitive ProgrammingCompetition.

IIITV • 2022

- Problem solving / DSA

SKILLS

Languages: JavaScript, TypeScript, C++, Java, SQL

Testing & Build: Jest, Enzyme, React Testing Library, Webpack, Babel, NPM

Frontend: ReactJS, Redux, Redux Thunk, Redux Saga, React Hooks, Context API, Material UI, HTML, CSS3, Responsive Design

API & Security: REST APIs, Axios, HTTP/HTTPS, JWT Authentication

Tools & Methodology: Git, GitHub, Jira, SonarQube, Agile, Scrum
